

THE MATTE TOP COAT

SAME COLOUR. COMPLETELY DIFFERENT FINISH.

Apply. Cure. No Wipe. Matte.

Transform any gel colour with The Matte Top Coat by Tayla-Made Nail Co.

Designed to replace the traditional glossy finish with a smooth, silky matte effect, The Matte Top Coat gives nail techs another way to completely change the appearance of their favourite colours and nail art.

One colour can look completely different depending on how you finish it.

Gloss gives you shine, reflection and depth. Matte softens that reflection and transforms the surface into a smooth, sophisticated finish with an entirely different character.

And because The Matte Top Coat is no wipe, achieving that transformation couldn't be simpler.

1 SILKY MATTE A smooth, sophisticated matte finish with consistent, even coverage.	2 TRANSFORM COLOUR Give existing shades an entirely different appearance without changing colour.	3 NO WIPE Cure for 60 seconds. No cleanser or inhibition-layer removal required.
4 MATTE + GLOSS Create contrast using finish and texture - even over the same colour.	5 NAIL ART READY Use over compatible colour, hand-painted designs, glitters and effects.	6 15ML Professional bottle with gold lid and curved/rounded precision brush.

ONE COLOUR. TWO COMPLETELY DIFFERENT LOOKS.

One of the simplest ways to expand what you can create with your existing colour collection is to change the finish.

Apply The Gloss Top Coat and your colour has a smooth, high-shine finish.

Apply The Matte Top Coat over that same colour and suddenly it can look completely different.

Deep shades can become softer and more sophisticated. Bright colours take on a completely different character. Glitters and effects can change dramatically when their reflective glossy surface is removed. Even familiar colours can feel new again.

You don't always need another colour. Sometimes you just need another finish.

A SILKY MATTE FINISH

MATTE SHOULD STILL LOOK BEAUTIFUL.

A matte finish shouldn't look dull because the application is uneven. It should look deliberately matte.

The Matte Top Coat has been selected to create a smooth, silky and sophisticated matte effect across the nail.

The formula is designed to provide even coverage so that once cured, the finished surface has a consistent matte appearance rather than areas of unwanted shine.

The result is clean, modern and understated.

No gloss. No shine. Just beautifully matte.

NO-WIPE FORMULA

CURE. FINISH. DONE.

The Matte Top Coat is a no-wipe formula.

Once it has received its complete cure, there is no inhibition layer that needs to be removed with cleanser.

Apply Cure for 60 seconds Finished.

No additional cleansing step is required.

Allow the finished surface to cool momentarily after curing before touching the nail or applying cuticle oil.

MORE THAN A FULL MATTE MANICURE

The Matte Top Coat doesn't have to be used across the entire nail.

It can also become part of the design itself.

Combine matte and gloss finishes within the same set - or even on the same nail - to create contrast using texture and finish rather than colour alone.

Matte nails with glossy detailing • Gloss nails with matte detailing • Matte French designs • Tonal nail art •
Matte and gloss patterns • Matte backgrounds with glossy accents • Feature nails within an otherwise glossy set

The colour may be exactly the same. The finish creates the contrast.

TRANSFORM YOUR NAIL ART

Matte top coat can completely alter the appearance of nail art as well as solid colour.

Use The Matte Top Coat over compatible: The Base with your chosen compatible gel colour • The Base Colour
• The Perfect Gel Polish - The Perfect Black & The Perfect White • Other compatible gel colours •
Hand-painted nail art • Selected glitter designs • Effect designs • Tonal nail art

Experimenting with matte and gloss finishes gives you another creative tool without needing to introduce another colour or nail art product.

DESIGNED TO BE WORN

A beautiful matte finish still needs to perform as a professional top coat.

The Matte Top Coat formula has been designed to provide a long-lasting finish and to resist everyday surface scratching, helping the matte surface maintain its appearance through everyday wear.

As with any nail enhancement product, wear will depend on correct preparation, application, curing and the client's lifestyle.

SOAK-OFF

The Matte Top Coat is a soak-off gel formula.

When used over a complete soak-off service, it can be removed as part of that soak-off system.

When used over a product such as The Builder, follow the maintenance or removal requirements of the underlying enhancement rather than treating the entire service as a soak-off system.

HEMA FREE & TPO FREE

The Matte Top Coat is formulated HEMA Free and TPO Free, consistent with the Tayla-Made Nail Co gel system.

As with all professional UV/LED gel products, avoid contact with the skin and surrounding tissue and ensure the product receives its complete required cure.

HEMA Free and TPO Free doesn't replace responsible gel application.

THE TAYLA-MADE FINISHING DUO

GLOSS OR MATTE? YOU DECIDE.

The Gloss Top Coat and The Matte Top Coat give nail techs two completely different ways to finish a Tayla-Made service.

THE GLOSS TOP COAT	THE MATTE TOP COAT
Smooth. Reflective. High shine.	Silky. Smooth. Sophisticated matte.

Keep both at your nail desk and choose the finish that suits the colour, design or client.

Or use both within the same design.

Two top coats. Endless ways to finish.

15ML BOTTLE

The Matte Top Coat comes in a professional 15ml bottle.

Like The Gloss Top Coat, it is presented in the luxe Tayla-Made matte white bottle with a gold lid, identifying the two finishing products within the core range.

It also features the Tayla-Made curved/rounded precision brush, giving greater control around the cuticle and sidewalls while allowing smooth, even application across the nail.

HOW TO USE

- 1** **COMPLETE YOUR COLOUR OR DESIGN**
Complete and cure your chosen Tayla-Made colour, structure or nail art application as required.
- 2** **APPLY THE MATTE TOP COAT**
Using the curved/rounded precision brush, apply a thin, even layer of The Matte Top Coat across the entire nail. Pay particular attention to achieving complete and even coverage. Because the finished surface is matte, inconsistencies in application may become more noticeable once cured. Work carefully around the cuticle and sidewalls and avoid contact with the surrounding skin.
- 3** **CHECK YOUR APPLICATION**
Before curing, look carefully across the entire surface of the nail. Make sure the product has been applied evenly and that no areas have been missed.
- 4** **CURE**
Cure for 60 seconds under a compatible UV/LED nail lamp.
- 5** **YOU'RE DONE**
The Matte Top Coat is no wipe. No cleanser is required after curing. Allow the finished surface to cool momentarily before touching the nail or applying cuticle oil.

WHY YOU'LL LOVE IT

• Creates a smooth, silky matte finish	• Instantly transforms the appearance of gel colours
• Gives existing colours an entirely different look	• No-wipe formula
• Long-lasting finish	• Designed to resist everyday surface scratching
• Ideal for full-colour manicures	• Suitable over nail art
• Perfect for matte and gloss contrast designs	• Suitable for tonal nail art
• Designed for smooth, even coverage	• HEMA Free
• TPO Free	• Soak-off formula
• UV/LED curable	• 60-second cure
• Professional 15ml bottle	• Tayla-Made curved/rounded precision brush
• Luxe matte white bottle	• Gold lid

PROFESSIONAL TIPS

MATTE SHOWS EVERYTHING.

A glossy surface reflects light, which can sometimes disguise small inconsistencies. Matte doesn't.

Take the extra few seconds before curing to make sure The Matte Top Coat has been applied smoothly and evenly across the entire nail.

Check around the cuticle, down both sidewalls and across the centre of the nail.

Even application = even matte finish.

USE FINISH AS PART OF YOUR NAIL ART.

Don't think of The Matte Top Coat as something that simply goes over the whole finished nail.

Think of matte itself as a nail art effect.

Combining matte and gloss over the same colour can create subtle designs that only become visible as the light moves across the nail.

Black-on-black designs are particularly effective - the colour remains the same while the difference between gloss and matte creates the design.

Sometimes contrast doesn't need another colour. It just needs another finish.

AT A GLANCE

Product	The Matte Top Coat
Product Type	Professional No-Wipe Matte Gel Top Coat
Finish	Silky Matte
Size	15ml
Bottle	Luxe matte white
Lid	Gold
Brush	Curved/rounded precision brush
No Wipe	Yes
Formula	HEMA Free & TPO Free
Removal	Soak-off formula; overall removal method depends on the underlying system
UV/LED Cure Required	Yes
Cure Time	60 seconds
Primary Uses	Matte finishing layer over gel colour and nail art; matte/gloss contrast designs
Best For	Nail techs wanting to transform existing colours and nail art with a smooth, sophisticated matte finish
